FYI. The disabling injury frequency rate is the number of disabling injuries per one million man hours worked during the reporting period. This is in accordance with the U. S. A. Standard Method of Recording and Measuring Work Injury Experience. Our annual rate was 3.5 for calendar year 1967.

Handwritten:

"1-5 Mr. Osborn -

To save time, paper, records, etc., I suggest future report letters come up under routing sheet only. No need for your separate memo.

/s/Coffey"
